

## **Inores Becomes HyperSizer® Distributor in Rapidly-Growing Turkey**

Collier Research Corporation, the makers of HyperSizer® Composite Structural Analysis and Design Software, have contracted engineering company Inores to serve as a local distributor of HyperSizer® in Turkey. Turkey, one of the fastest-growing economies in the world with a young and educated workforce, offers a promising market for HyperSizer®. The agreement with Inores is part of a larger movement by Collier Research to accelerate use of its software in emerging markets and expand its application in wind energy.

Inores founding partners Serkan Us and Akgün Kalkan have keen knowledge of the wind energy, aerospace, construction and marine industries. Their focus is on composite structure engineering and wind-energy engineering, providing composite design, finite element analysis and manufacturing simulation solutions to their customers.

“Inores has established partnerships with leading companies to provide solutions in a broad portfolio for composite design,” said Mr. Us. “With its extensive analysis and optimization capabilities, HyperSizer® is a perfect match for our portfolio and objectives. Our partnership with Collier Research now completes our composite structure design and analysis solutions, from concept design to mass manufacturing of composite parts and vehicles. HyperSizer® provides micromechanical analysis, preliminary sizing, advanced failure analysis and optimization of structures. This software will be one of our key products because of its unique and complementary specialties.”

### *About Collier Research Corporation*

*Collier Research Corporation is one of the world’s leading engineering software providers to the aerospace industry and NASA, providing structural tools, methods research, and software solutions with its flagship product, HyperSizer®. As a trusted industry leader, HyperSizer® provides aerospace stress analysis and sizing optimization, reducing the weight of aircraft and space vehicles, whether designed with composites or metallic materials. HyperSizer® analyzes dimensions and layouts, reducing structural weight, and creates the stress report for aircraft certification.*

### *About Inores*

*Inores has been established with a vision to provide customer-oriented, problem-specific innovative engineering solutions. The company aims to provide and popularize efficient and feasible usage of advanced engineering products and techniques, offering services in these areas to support added value creation. Inores provides complete advanced engineering solutions focused on Composite Structures Engineering, employing unique Computer Aided Engineering technologies and knowledge widely used in Aerospace, Defense, Energy, and Marine industries.*
